

1 Welcome to your sub-domain at n1america.com/webs-a-gogo  
2  
3 Treat this directory as the root of your website. Much like the C:\ drive of your computer.  
4  
5 You can drag and drop files and folders to this folder just like any other folder on your com  
6  
7 It is User/Password protected.  
8  
9 It is also known as an FTP folder. FTP (Files Transfer Protocol).  
10  
11 Files you upload to this folder can be viewed on the web by directing/linking the visitors br  
12  
13 <http://www.yourwebsite/files/yourfilename.extension>  
14  
15 ie: file.html, file.htm, file.pdf, file.asp, etc..  
16  
17 Your FTP folder is a directory located on the root of your website directory called "files". T  
18 linking etc. should be "/files/your stuff".
